

Mission Statement:	Provide information to the Commissioners on the greenhouse gas footprint of Chester County, PA	MISSION	6/6/2008 14:59
Date Last Updated:	5/6/2008	LAST UPDATE	6/6/2008 14:59
Goals:	A. Develop a greenhouse gas inventory for Chester County operations B. Working in concert with the Delaware Vally Regional Planning Commission, develop an estimate of the greenhouse gas emissions for Chester County, and it's municipalities.	GOALS	6/6/2008 14:59
Key Activity:	Identify the sources for data necessary to build a county-operations greenhouse gas inventory, collect the data, convert the data to CO2, CH4, N2O, HFC, PFC and SF6 emissions, then calculate an overall CO2e emissions footprint for the years 2005-2007. Work with the DVRPC to insure that the regional inventory estimate that they are producing will satisfy out requirements for an overall county and municipality inventory estimate.	KEY ACTIVITY	6/6/2008 14:59
Timeframe:	County Operations Inventory - End of July 2008 County/Municipality Inventory Estimates - End of 2008	TIME FRAME	6/6/2008 14:59
Results:	The first meeting has been held with Chester County Facilities to identify the data sources available. Additional meetings are being planned. We will be making a direct request to county electricity and natural gas suppliers to see if they can provide needed data in electronic format, reducing the need for data transcription from paper invoices.	RESULTS	6/6/2008 14:59
