

2010 GSC Stream Cleanup a Success!

On April 8, eight Chester County Government Services Center employees from four different departments volunteered to remove trash from the stormwater basin, parking lot and areas alongside Goose Creek, which flows adjacent to the GSC building and driveway. More than 11 bags of trash were collected. This effort is an important part of Chester County's responsibility to meet state stormwater permit requirements.

Thanks to those employees who participated from the Departments of Open Space Preservation (Bill Gladden, Curt Lammey), Parks and Recreation (Karen Marshall), the Planning Commission (Patti Stauber, Tom West), and Chester County Water Resources Authority (Dani-Ella Betz, Emily Gallo, and Craig Thomas).

A special thanks to Chester County Water Resources Authority for coordinating the event, and Chester County Facilities Department for supplying bags and gloves, and disposing of the collected trash. Everyone's efforts made a significant positive impact toward improving the water quality of our local watershed.

Chester County employees pick up trash along the stream corridor adjacent to the GSC driveway as part of the April GSC clean-up. More than 11 bags of trash were removed from the stormwater basin, stream corridor, roadside and parking lot.
